About 80 persons were working in workshop 6. Of these about 50
belonged to the TTK-43 department, 20 to the technology department,
while about 10 were interpreters and translators, most of whom
were Soviets. Von der Fange repeatedly ordered that no cast iron
parts were to be used for the construction of jigs and appliances
(Vorrichtungen). As far as possible, all connections had to be
welded because cast iron connections would probably be in short
supply.
